DEFINITIONS:

Wall Sign. Any sign attached parallel to a wall, painted on the wall surface or erected and confined within the limits of an outside wall of any building or structure, which is supported by such wall or building and which displays only one sign surface. No wall sign shall extend more than six (6) inches from any wall, building, or structure.

Freestanding Sign. Any sign supported by structures or supports that are placed on, or anchored in the ground, and that are independent from any building or other structure. A permanently affixed sign which is wholly independent of a building for support with a base of a width not less than the width of the sign face. The base of the sign face shall be flush with the supporting base, and the supporting base shall be flush with the ground and extend the full width of the sign. Except for subdivision entrance signs, freestanding signs may not be constructed before the principle building is on a lot.

- Freestanding sign structure/base materials shall be constructed of brick or stone with a base of at least two (2) feet. Any sign panels on a sign shall have a uniform background color and material. All freestanding signs shall display the property address in numbers at least six (6) inches in height but not more than twelve (12) inches in height. The numerical address shall not be considered part of the sign face and shall not count against the allowable sign square footage (Article 33, Section 25.E.).
