Re: "Old Medlock" Tower Photo Simulations

PM&A is an Atlanta Engineering and Real Estate firm engaged by Skyway Towers, a tower company, to conduct a balloon test for a proposed tower at 10475 Medlock Bridge Road Johns Creek GA. (Parcel ID#: 11 09200325C01)

The proposed tower height at this location is 76 feet (80' with lightening rod) and the proposed tower type is a monopine. This report is conducted so that a visual approximation of the proposed tower can be shown.

PM&A floated a balloon at the proposed tower height of 80' to use as a reference for the height of the tower. Photos are shown from each of the four (4) cardinal directions. Additionally a map is included depicting the approximate locations from which each photo was taken.

The balloon was flown and pictures were taken on 9/20/2016 from 12:00pm until 2:00pm.

If there are any additional questions I can be reached at 678-280-2325 or fromeo@pmass.com.

Sincerely,

Kevin Krueger
